

Healthy Volunteers Needed !!!

Neurocognitive Study

You are invited to participate as a healthy control in a research study looking at cognitive functioning, such as attention and memory, in head and neck cancer patients.

Why does the study need healthy volunteers?

We need people without cancer to participate so that comparison can be made with cancer patients.

What will we ask you to do?

You will be asked to provide a blood sample and schedule an appointment to complete questionnaires and undergo cognitive testing that assesses functions such as attention and memory.

You will be asked to attend 5 appointments in total, spread out over 5 years. Each appointment lasts approximately 2 hours. After the first appointment, you will be assessed again 6, 12, 24, and 60 months later.

To be eligible you must:

- Be 40 years old or older
- Have never been diagnosed with cancer
- Have never received chemotherapy and/or radiotherapy treatment
- Be able to read, write and speak English
- Have no significant hearing or visual impairment

If you are interested in participating in this study, please contact:

KATTLEYA TIRONA
